COMPANY

EXPERIENCE AND INNOVATION *since 1974*

MaxPlast is synonymous with excellence with **50 years** of experience, playing a leading role in both the retail and food industries. The desire to offer a quality product that meets our customers' expectations has driven and continues to drive us to invest in cutting-edge technologies and the most innovative production processes available on the market.

MAXPLAST SRL was established back in **1974** as a sole proprietorship by the foresight of Mr. **Pieragnoli Massimo**, who still serves as its administrator today. Over the years, with the help of his daughter **Chiara**, and his sons **Fabio** and **Giacomo**, the company has expanded its business, becoming specialized in the processing of biodegradable and compostable materials as well as multilayer materials.

In recent years, two new companies have emerged, both owned by the Pieragnoli family and therefore connected to Maxplast Srl: **3 F Srl** and **Supermax Srl**. These two new companies, which also operate in the processing of plastic materials, were created to support Maxplast Srl, but above all to provide the opportunity to create new job positions and to involve subcontractors in work opportunities as well.

THE PRODUCTION SITE

MaxPlast is located in Fara Filiorum Petri, a small town in the province of Chieti in the Abruzzo region, in the heart of central Italy on the Adriatic Sea side, within a total area of 67,000 square meters.

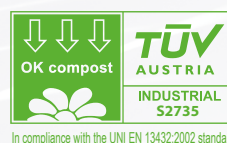

THE MISSION

The mission of the Pieragnoli family is not only to run a business but also to have a strong social commitment, ensuring business continuity while respecting the workers and, above all, the environment surrounding us.

*Help us respect
the Environment*

GARBAGE BAGS ULTRA RESISTANT

Saccobello ElasticBag is a garbage bag in **LDPE** for differentiated and undifferentiated waste collection. Ultra resistant thanks to the triple layer of which it is composed, maximum watertightness thanks to the anti-drip bottom and is equipped with innovative elastic drawstring that give the bag the possibility to widen and narrow once inserted in the bin preventing the bag once filled, from settling on the bottom. The drawstring allow easy closure and carrying. The bag is made entirely in Italy.

+ Performing

- ✓ Ultra-resistant thanks to the triple layer.
- ✓ Maximum watertightness thanks to the anti-drip bottom.

+ Practical

- ✓ Elastic drawstring closure to prevent the bag from settling on the bottom.
- ✓ Elastic drawstring for easy closing and carrying.
